

Faivre fish pump

Pescamotion 6 – a fish pump for live fish

**For gentle transportation of fish between 5 and 550 grams. Variable speed regulation.
The pump is delivered as standard with two 6" female Camlock units and a suction cone.**

- Variable speed regulation, functional for all pumping tasks
- Wheelbarrow frame makes it highly portable
- High capacity, 8-10 tonnes/hour
- Lifting height up to 6 metres
- Weight: 200 kg
- Remote control from a distance of up to 30 metres
- Super-fast prime drive motor
- Maintenance-free 'direct drive system' pump

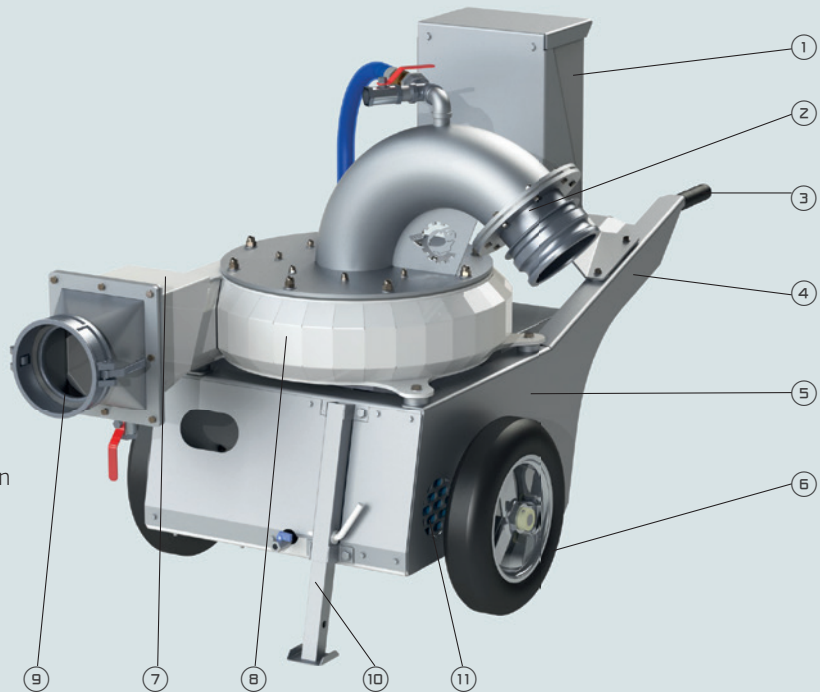

Additional equipment:
Water separator for loading tanks

Faivre fish pump

COMPONENTS

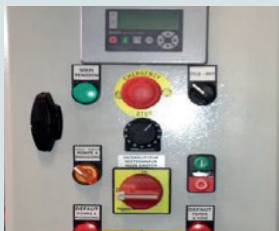

1. Electrical box
2. Ø150 (6") intake pipe
3. Handle
4. Aluminium 'wheelbarrow' frame
5. Direct drive geared motor
6. Inflatable tire, Ø400 mm
7. Pump outlet valve
8. Stainless steel pump housing
9. Ø150 mm (6") discharge connection
10. Stabiliser foot
11. Priming pump

Model	PESCAMOTION 6
Drive motor:	5.3 kW, 400 V, 3ph, 50 Hz
Drive motor control	Frequency-controlled drive motor
Prime drive motor	0.75 kW, 400 V, 3-phase, 50 Hz
Inlet:	6" (Ø152 mm)
Outlet:	6" (Ø152 mm)
Dynamic head:	6 metres
Fish size	5–550 g, salmon and trout.
Pump speed:	200–750 rpm
Water flow:	35 l/sec. or 2,100 l/min.
Dimensions:	76x86x106 cm (LxWxH)

Optimum choice of materials. Alu frame and AISI 316 pump housing.

Control cabinet with frequency converter

Inflatable transport wheels, Ø400

The pump comes with 2 remote control units as standard. Select one of four pump speeds or stop.

6" to 4" reducer can be delivered as extra equipment
